

# PhD courses on micro/nano-electronics

EURO  
DOTS

[www.eurodots.org](http://www.eurodots.org)

training modules for PhD students and engineers from industry

scholarships for PhD students

in-depth training on micro/nano-electronics and micro-systems

state-of-the art level

direct connection with research

more than 35 course modules already scheduled for 2012

full course catalog and calendar on [www.eurodots.org/Courses.asp](http://www.eurodots.org/Courses.asp)

Meet your future partners in industry

Visit another university and expand your horizon

Stay tuned in the fast moving field of nano-electronics

Broaden your knowledge by meeting top expert lecturers

Apply for a scholarship and get financial support to attend these courses

Collect your ECTS credits by attending courses from this European platform

## TELL ME MORE

EURO-DOTS is a virtual European platform offering high quality training modules to PhD-students in micro/nano-electronics.

Scholarships are available for attending EURO-DOTS courses. The eligibility requirements for a scholarship and the registration form can be found on [www.EURODOTS.org](http://www.EURODOTS.org).
